

Unique Structural Company & Unique Garages

“Yes, we can supply your new shed. Would you like a house with that?” So says Bo Williams in describing the way his company has spread its wings – from building garages to now constructing just about anything that has a roof.

Unique Structural Company is the domestic construction side of Unique Garages Hinterland & Sunshine Coast – builders of quality garages. The company now builds quality steel frame constructions for any domestic situation and is a registered house building company.

Owners Bo and Sue Williams have settled into their newly refurbished setting at 18 Coral Street, Maleny, centrally located for convenience.

“People are welcome to check out our product range so that they can feel assured we can build your next project and supply your quality water tanks and accessories,” said Sue.

“You can be assured that when you choose a Unique building – it is the right decision.

Unique Structural Company’s vast experience in the construction industry and manufacturing of steel frame buildings spans 20 years and they can design a wide range of buildings to suit your requirements.

They have the expertise to specialise in non-standard construction of almost anything.

“If it’s made out of seel, consider it done!” said Bo.

Cladding can be metal cladding or your choice of wall cladding.

“It’s also important to consider the energy efficiency of your building and Unique Structural Company can assist you with this, using high quality industry standard materials,” said Bo.

“We pride ourselves on quality products and excellent service.”

Wide range of structures

Unique Structural Company’s domestic project range includes:

- houses • house extensions • granny flats • office/workshops • studios and liveable sheds/week-

endings, site preparation, concrete slab, construction, plumbing, and electrical etc, and the job can be completed to lockup stage or full inside fit out,” said Bo. “Our local team work very hard to give you a unique quality product.

Clarke Water Tanks

When buying a water tank consider a Clarke Water Tank. “We recommend and sell these quality water tanks,” said Sue.

“Clarke Water Tanks come with a 25 year guarantee. The walls are much thicker at the base where the pressure is, they have

more ribs for strength, have a raised outlet and overflow ensuring a full tank of water, and there are no vertical seams.”

Clarke Tanks are made from durable, UV stable food grade polyethylene which has no fibres, rust, corrosion or taste tainting problems.

Included with your tank are the 400mm strainer, 90mm overflow strainer, brass outlet

and gate valve up to 2 inches. Delivery is free for tanks over 1000 gallons but the site must be prepared and accessible by truck. “We can also assist with site preparation,” said Sue.

“The attractive multiple curved rib profile has a quality finish to complement quality homes, and there is a range of colours from which to choose. Clarke Tanks are far better by design.”

Sue said “you get what you pay for” when it comes to tanks. “We believe quality is important. Our customers will see us supply and promote only top quality products.”

• Visit the office at 18 Coral Street, Maleny to discuss your next project. There is on and off-street parking for you in a garden setting. We have eftpos/credit card facilities and can help you arrange finance if required.

Unique Structural Company is happy to meet with you outside normal office hours or on Saturday morning by arrangement. Call us on 5494 3672 to make an appointment.
